Orchestration Logic is Hard to Change

# Baker

Declare the Logic Like a Recipe

Visualize the Logic

Don't Worry About Retries and State

Up to 4x Faster Time to Market

Less Incidents

Business and IT Speak the Same Language

Under the Hood

DSL for Recipes

Actor Model with Petri nets

Event-Driven Architecture

```java
return new Recipe("DemoAtTwitterHQ").
        withInteractions(
                of(AssignAccount.class),
                of(GetAccount.class).
                        withRequiredEvent(TermsAndConditionsAccepted.class),
                of(RegisterIndividual.class)).
        withSensoryEvents(
                TermsAndConditionsAccepted.class,
                IndividualInformationSubmitted.class);
}
```

```
//notify Baker when events occur
baker.handleEvent(processId, new SensoryEvents.IndividualInformationSubmitted(name, address));
baker.handleEvent(processId, new SensoryEvents.TermsAndConditionsAccepted());
```
